PROFESSIONAL SUMMARY

Creative Technologist and Computer Engineering undergraduate specializing in interactive web experiences, real-time 3D graphics, and hardware-integrated systems. Combines strong full-stack development (React, Next.js, TypeScript) with advanced visual technologies (Three.js, React Three Fiber, GLSL) and hands-on prototyping. Fluent in English, Indonesian, and Japanese. Passionate about building immersive digital products that bridge software, design, and physical computing.

TECHNICAL SKILLS

Frontend & Full-Stack:	React, Next.js, TypeScript, Tailwind CSS, Framer Motion, HTML5, CSS3, Responsive Design, REST APIs
3D & Interactive:	Three.js, React Three Fiber (R3F), GLSL Shaders, WebGL, Canvas API, Performance Optimization
Tools & Others:	Git, Figma, Python, Node.js, Problem Solving, Debugging
Soft Skills:	Public Speaking, Creative Design, Technical Communication, Team Collaboration

FEATURED PROJECTS

H2ORIZON - Smart Adventure Bottle	Gold Medal - JISF 2025
Embedded Systems IoT Hardware Prototyping	2025
- Designed and prototyped a smart adventure bottle concept focused on real-time hydration and environmental sensing for outdoor explorers. - Integrated sensor concepts and hardware thinking with product design to create a practical, user-centered solution. - Awarded Gold Medal in Innovation Science Category at Jakarta International Science Fair 2025.	
Interactive Web & 3D Experiences (Personal Projects)	Ongoing
Portfolio: tristanedgina-portofolio.vercel.app React Next.js Three.js/R3F GLSL Framer Motion	
- Building interactive portfolio and experimental projects combining real-time 3D graphics, custom shaders, and smooth motion design. - Focus on performance optimization, responsive design, and immersive user experiences (details available on GitHub).	

AWARDS & COMPETITIONS

Gold Medal - Jakarta International Science Fair (JISF) 2025	April 2025
Innovation Science Category Project: H2ORIZON Organized by IYSA & Ministry of Religious Affairs DKI Jakarta	
Samsung Innovation Campus Batch 6 - Stage 4 Participant	May 2025
Selected among top ~150 finalists (~top 1.5%) out of 10,000+ national applicants in AI, IoT & Programming (Samsung & Hacktiv8)	
2nd Place - Schools Reinventing Cities 2025 (West Jakarta)	June 2025
C40 Cities & Minecraft Education Global Initiative Focus: Integrated Low-Emission Zone concept	
Top 10 Team - Demo Day, Innovation Challenge 2024: Generasi Terampil	Nov 2024
UNICEF + Kemendikbudristek + Dinas Pendidikan DKI Jakarta + Markoding Selected from 2,700+ participants	

EDUCATION

Telkom University	Expected Graduation: 2030
School of Computer Engineering Indonesia	
Bachelor of Computer Engineering (Undergraduate)	
Relevant Coursework: Embedded Systems, Microcontrollers, Computer Networks, Data Structures & Algorithms, Software Engineering, Interactive Media	

LANGUAGES

English Professional working proficiency	Indonesian Native	Japanese Conversational/ Working proficiency
